REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claims are allowable over the prior art of record because the prior art fails to show or suggest, either singly or in combination thereof, a height adjustment mechanism for a seat including a support link for supporting a seat cushion by attaching a lower portion to the floor and attaching an upper portion to the seat cushion, an adjustment means for adjusting the height of said seat cushion by a tilting movement in the forward and backward directions, wherein a stopper link is provided in which a base end portion is attached to the floor side so as to rotate a second end portion in the forward and backward directions within the perpendicular face of the support link. A projection is provided on said rotating end portion side, and an irregular face is arranged on the support link so as to be extended in a direction crossing a moving locus of the projection, and inhibiting further rotation of said support link in cooperation with the projection when the irregular face is engaged with the projection when the seat is subject to a colliding force. A stopper abuts the projection in a position of the projection which is not engaged with the irregular face, and inhibits the separation of the projection from the irregular face. Biasing means are provided for biasing said stopper link in a direction in which said projection abuts on said stopper.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
